"LIBERTY, THE UNION, AND THE CONSTITUTION."

NUMBER 103

## CITY OF WASHINGTON, TUESDAY MORNING, AUGUST 25, 1857.

management of this department; in addition to which, by law recently passed, the Socretary of the Interior is charged with the construction of the three wagen roads leading to the Facilic coast.
The department requires an additional building for its accommodation, and the erection of one has been repeatedly recommended dering
the last few years for that purpose. At present the Pension Office is
provided with recons in what is known as "Winder's Building," while
the clair branches of the department, including the Secretary's office,
are all crow-tod into the Patent Office building, the whole of which
will be required at an early day for the use of the Patent Office, for
which it was originally intended.

The following is a brief indication of the duties of these several offies, and of the force employed therein, respectively:

Senetary's Office.—Hon. Howell Cobb, Secretary of the Tronsury;
Iba, Philip Chyton, assistant Secretary; one engineer in charge; one
architect, and three draughtsmen temporarily employed, and twentylare cierks. The Secretary of the Treasury is charged with the general supervision of the face it transactions of the government, and of the
execution of the laws concerning the commerce and navigation of the
linest States. He superintends the survey of the coast, the light-bourse
establishment, the marine hospitals of the United States, and the confluction of terrain public buildings for custom-bousses and other perpose.

Proc.

OFFERED FOR SALE TO THE PUBLIC IN LOTS. THIS property has been held under an act of in-corporation since 1838. The charter-of property then consiste of 1,183% acres of land; in Fauquier county, including the improve-ments thereon, and was divided into 2,500 shares, estimated in the charter at \$100 each. The subscriber having subsequently reacquired

reside on it for the summer season only, or for the year. The inducements to build will be irrestable; and the fact of such buildings being erected will immeasurably enhance the value of the Springs and of the loss. There is no reason why a city of magnitude should not rise up and flourish at this place. The Rapashannock river is navigable to the spot. A very little energy would always keep the locks in repair. The Alexadria and Lynchburg raircoal crosses the river about 8 or 2 miles below this land. Coul, at a cheap rate, may be unbaded from the cars into the boats. Intelnite steam power may thus be commanded at will; and the facility of transportation gives the same advantage which lowell has for unlimited business. The railroad, siready within 6 miles, will soon extend to New Orleans, whose inhabitants may lice reach these Springs in three days. As healthy a spot as any in Virginia—in an abundant region—with all these facilities why should not a city thrive and proper leve? At all events, around these health giving waters, already so extensively and beautifully improved, all, the high and the low, the rich and the poor, have now an opportunity of separating for the summer season, or longer, on terms graduated by their means; and the benigmant ossign of the legislature in granting the charter may be realized to the fullest extent.

This property is unadered to the public at about the value on which the taxes are paid to the State, and greatly below the original outhy. The assessment was made by an intelligent public officer noway interested. Almost indefinite profits may be realized on if the plan of sale be carried out. If it be not, no one will be injured; even the small sum of ten dollars in not required to be paid until the subscription be completed, and the paper, as so give assurance of good tide—a utile reported in 1838, by able attorneys, as then entirely satisfactory, and which has been doubly confurmed by 19 years of quiet, undistorbed possession since that time.

The plan or estimating lots an? sha

and which has been doubly confirmed by 19 years of quiet, undistorted possession since that time.

The plan or estimating lots and shares in the Springs Company, as
of equivalent value in the partition, will save trouble in the division, and after this partition the interests of the lot-holders and Springs
stockholders will be in low entirely distinct, while the success of one
party mist greatly colance the other. Any one may subscribe for
one or more shares in this purchase, and his interest will be in pronortion.

NOTE.—1. All the streets are 60 feet wide, and run north and south, cast and west.

2. Each square, in the plan, fronts 250 feet on streets running east and west, and 220 feet on streets running north and south, and (with its portion of the streets and alley) contains about two acres.

3. No payment of even the \$10 is required till it is ascortained, by the number of subscribers, that a city is to be built; in which event the value must greatly exceed the cost.

4. In the partition the 10,000 lots will be represented by tokens, with the number of square and of let on each. These tokens will be put in the same vessel with 2,500 similar ones, taxified "I share of stock." In another vessel subscribers' names will be put, (each name repeated according to the number of shares he may have taken) and in the drawing, as in the division of large estates among numerous beirs, each will thus have an equal chance with any other of getting a share of Spring stock, or the more highly valued lot.

The 2,500 who get the shares of stock will, for the suggregate sum of only \$25,000, get the 65 acres, heliciling the Sulphur Spring, the buildings, (assessed at \$50,000,) and the furniture.

Those who get suitable building lots for large botels may be still more successful, while those loses fortunate will get building lots of 25 by 100 feet, that must be worth, as the population increase, much more than the cost.

5. Subscription lists and lithegraphic plans of the proposed city are

Valuable Farm and Water-power for Sale.

THE undersigned offers at private sale a very de-southeast extremity of classics county, Maryland, and is bounded on the south by the Potsmac river, on the east by the Wiconico river, and on the north by a creek that empites its waters into the Wiconico, and at the mouth of which there is sufficient current to propel mills and at the monitor of which there is stational charges as proper not nay desirable extent.

The lands are well adapted to the growth of corn, wheat, and to bacco; and, from the abundance of sea grass that annually fleats on its shores and the quantity of shells that are on it, could be made one of the richest farms in the county. There is a superabundance of wood, and a comfortable dwelling-house, kitchen, quarters, corn-house, stables, and a large burn, all in good order. Oysters, fish, and wild fowl are abundant. Communications to Baltimore and the District of Columbia are almost daily.
